DETAILED ACTION

This office action is in response to applicants' communication filed on 6/1/07.

Claims 1-7 and 10-11 are pending in this application. Claims 8-9 have been canceled.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-7 and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/27173.

WO'173, page 114, compounds 1-6 anticipate instant claimed compounds, composition and method of controlling pests, when in the instant claims, M is O, R5 is heterocyclyl, X1 and X2 are Cl, Y is O, A1 is bond, T is bond, A2 is a bond, W and Q are O, A3 is propylene.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1621

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
6. Claims 1-7 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over combined teachings of WO'173 and Ikegami et al(US 6,437,184).

WO'173 is teaching structurally similar compounds, composition and method of use as claimed herein, se for example pages 113-114. The difference between the reference and herein claimed compounds is that the reference does not teach oxime derivatives.

Ikegami et al are teaching structurally similar compounds and composition as claimed herein, wherein it is expressly taught that carbonyl and oxime groups are equivalent. See for example column 9-10, wherein carbonyl is suggested and various examples in columns 233-296, wherein oxime is suggested.

Art Unit: 1621

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to modify WO'173, by replacing carbonyl with oxime, as taught by Ikegami et al, because the latter reference is expressly teaching the equivalence of carbonyl and oxime group in the same art.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
